Magriña, Luis and Maurice Fournier 1974: Comment écrire le mbay Moissala. Centre d'Etudes Linguistiques, Collège Charles Lwanga, Sarh. This is actually a combination of two works. The first section contains Maurice Fournier's groundbreaking analysis of Mbay phonology and his proposals for a writing system. Of special importance are his analysis of tonal changes. This little work is followed by a new transcription, using Fournier's proposal, of some of Joseph Fortier's Mbay Folk Stories taken from Fortier (1967). The transcriptions of the vowels and of the tone is fairly phonetic, and shows the actual pronunciation of complex Mbay words.
